

Dr. Kevin M. Bohacs
ExxonMobil Upstream Research Company

Dr. Kevin M. Bohacs FGS, FRGS is a Senior Research Scientist at ExxonMobil Upstream Research Company where he leads the application of sequence stratigraphy and sedimentology to mudstones from lacustrine and fluvial to deep marine environments. He earned a B.Sc. (Honors) in Geology from University of Connecticut and Sc.D. in

Experimental Sedimentology from Massachusetts Institute of Technology. He has written more than 100 scientific contributions on the stratigraphy and sedimentology of mudstones, hydrocarbon source and reservoir rocks, and continental depositional systems (lakes, coals, paleosols, fluvial-floodplain systems, and paleoichnology). Dr. Bohacs is the co-author and editor of books on sequence stratigraphy, lacustrine hydrocarbon reservoirs, and field safety. He has received many best paper citations and awards (most recently, the Berg award for outstanding research from AAPG) and served as distinguished lecturer for several societies nationally and internationally.
